CORE SKILLS

GAME & LEVEL DESIGN

Mechanics Design · **Level Design** · Puzzle Design · Balancing & Economy · Game Feel / "Juice" · Player Onboarding

3D & WORLD BUILDING

Blender · **ZBrush** · Substance 3D Painter · Unreal Engine 5 · Lumen / Lighting · Modular Level Kits · PBR Materials

TECHNICAL PROTOTYPING

Unity 3D/2D · **C# Scripting** · XR Interaction Toolkit · Meta Quest · Physics / Ragdolls · Shader Graph

UI/UX & TOOLS

UI/UX Wireframes · Tutorial Systems · **Git** / **GitHub** · Adobe Illustrator · Firebase

EDUCATION

B.S. Game Design & Production

Riphah International University

Class of 2026 · **CGPA 3.77 / 4.00**

Game Development Certification

Government-Sponsored Program

2022 · **A+ Grade** · **90%+**

MUHAMMAD ALI

Game Designer | **Level & Mechanics Design** | **3D World Building** | **UI/UX**

Technical Foundation: Unity & C# Prototyping · VR/XR Interaction · Unreal Engine 5

PROFILE

Game Designer & 3D Artist with 3+ years of professional production experience designing and shipping **8+ commercial games** across Google Play and VR/XR platforms. Holds a **B.S. in Game Design & Production (CGPA 3.77)**. Combines creative mechanics design, level pacing, puzzle design, and intuitive UI/UX with high-fidelity **3D world building (Blender, ZBrush, UE5)** and hands-on **Unity/C# rapid prototyping** to deliver engaging player experiences from concept to release.

GAME DESIGN

PROFESSIONAL EXPERIENCE

Lead Game Designer & Prototyper

Early 2023 — Present

Kurly Brackets · Rawalpindi, Pakistan · On-Site

- Designed core gameplay loops, level progression curves, and game economies for **8+ commercial mobile games** shipped on Google Play across puzzle, arcade, physics, and party genres.
- Engineered intuitive **UI/UX flows**, responsive HUD canvas layouts, and interactive step-by-step tutorial sequences that maximized early-game comprehension and player retention.
- Rapidly prototyped mechanics and calibrated **physics feel, spring joints, and ragdoll combat** in Unity/C#, translating Game Design Documents (GDDs) into high-juice playable builds.
- Designed player-centric rewarded ad placements and IAP economies with backend **Firebase integration**; optimized runtime performance to ensure smooth 60 FPS mobile feel.

Game & Level Designer

6 Months

Motion Maze · Remote Studio

- Designed core game loop mechanics, level progression, and interface wireframes for mobile projects within an agile, collaborative remote studio pipeline.
- Collaborated cross-functionally with 3D artists and developers, establishing design specs and delivering playable Unity graybox prototypes via structured Git workflows.

SELECTED PROJECTS

The Forgotten Train: VR Escape

Solo Game Designer & 3D Artist · Unity XR · Meta Quest · PC VR

Atmospheric VR puzzle escape room designed 100% solo. Designed tactile escape room puzzle hierarchies, two-handed physical interactions, and docking systems; modeled all modular Victorian 3D assets in **Blender** with **Substance PBR** textures for immersive environmental storytelling.

Selah: Bible Charades

Lead Game & UI/UX Designer · Android · [Live on Google Play](#)

Published mobile party game featuring physical **gyroscope & tilt forehead motion controls**. Designed dynamic category deck progression, in-game video capture user flows, and responsive multi-resolution UI for accessible party play.

2468 Block Puzzle: 2048 Merge

Game & Systems Designer · Android · [Live on Google Play](#)

Fast-paced block-merging puzzle. Designed mathematical merge curves, board progression loops, competitive **Firebase leaderboards**, interactive onboarding tutorials, and satisfying audiovisual cascade "juice".

Mr Greedy: Ragdoll Punch

Combat & Mechanics Designer · Android · [Live on Google Play](#)

3D physics combat game. Designed slapstick fighting loops, calibrated **spring-joint ragdoll impulse curves**, dynamic impact camera shake feedback, and cosmetic avatar reward progression loops.
