PROFESSIONAL SUMMARY

Game Developer with a Bachelor's degree in Game Design and Production and over 3 years of experience working on indie and client-based game projects. Experienced in Unity game development, gameplay programming, UI implementation, 2D/3D asset integration, debugging, optimization, and VR development for Meta Quest platforms. Skilled in designing and developing interactive experiences from concept to completion, including gameplay systems, VR mechanics, multiplayer features, and 3D environments. Passionate about creating engaging gameplay experiences and solving technical challenges in game development.

TECHNICAL SKILLS

Programming

- C#
- C++
- Python (Basic)

Game Engines

- Unity Engine
- Unreal (Basic)

3D & Art Tools

- Blender
- ZBrush
- Substance Painter
- Character Creator

Game Development

- Gameplay Programming
- Game Mechanics Design
- UI Development
- Optimization
- Debugging
- Git
- Firebase
- VR Development

VR / XR

- XR Interaction Toolkit
- Meta Quest Development
- VR Interaction Systems

PROFESSIONAL EXPERIENCE

Indie Game Developer / Unity Developer

Freelance / Indie Game Development · 3+ Years

- Worked on **20+ indie and client-based game projects**.
- Developed and implemented gameplay features using Unity and C#.
- Fixed bugs, improved performance, and resolved gameplay issues.
- Designed and implemented UI systems and game menus.
- Developed 2D gameplay mechanics and interactive systems.
- Integrated and optimized game assets, animations, and visual elements.
- Collaborated on client projects from development through final builds.
- Prepared Android APK builds and assisted with publishing workflows.

FEATURED PROJECTS

The Forgotten Train — VR Escape Experience

Game Designer | Unity Developer | 3D Environment Artist

VR escape experience developed for Meta Quest where players solve puzzles inside a moving train environment.

Responsibilities:

- Designed gameplay mechanics and puzzle systems.
- Developed VR interactions using **Unity XR Interaction Toolkit**.
- Created and integrated 3D environments and game assets.
- Implemented player interaction and object manipulation systems.
- Developed the gameplay experience from initial design through final build.

OTHER GAME PROJECTS

2D Games & Client Projects

- Developed and contributed to multiple 2D mobile and client-based games.
- Implemented gameplay systems, mechanics, UI, and interactive features.
- Performed debugging, bug fixing, and performance improvements.
- Integrated game assets, animations, and visual elements.

AWARDS AND CERTIFICATION

Game Design Course (6 Months)

- Completed a 6-month Game Design program.
- Grade: A+
