PROFESSIONAL SUMMARY

Game Developer with a Bachelor's degree in Game Design and Production (3.77 CGPA) and over 3 years of experience developing commercial, indie, and client-based game projects. Experienced in Unity game development, gameplay programming, UI architecture, 2D/3D asset integration, debugging, performance optimization, and VR development for Meta Quest platforms. Skilled in designing and implementing interactive gameplay systems, VR interaction mechanics, monetization pipelines, and 3D environments. Passionate about engineering responsive, high-performance gameplay experiences and tackling complex technical challenges in modern game production.

EXPERIENCE

3+ YEARS

Game Developer

EARLY 2023 – PRESENT

Kurly Brackets • On-Site Studio

- Architected and implemented core gameplay mechanics, state machines, and responsive player controls using Unity and C#.
- Engineered modular, high-performance UI systems, dynamic HUDs, and animated menu flows across mobile game pipelines.
- Profiled CPU/GPU performance, resolved garbage collection spikes, fixed critical bugs, and maintained target frame rates.
- Integrated advertising networks (AdMob), In-App Purchases, and Firebase telemetry pipelines for live production titles.

Indie Game Developer / Unity Developer

2021 – PRESENT • 3+ YEARS

Freelance & Indie Client Projects

- Contributed to **20+ indie and client-based game projects**, delivering turnkey gameplay features, systems, and mechanics.
- Designed and developed 2D/3D physics interactions, player movement controllers, AI navigation, and interactive object systems.
- Integrated and optimized 3D models, textures, animations, particle effects, and audio systems for mobile and PC platforms.
- Collaborated directly with clients from rapid prototyping through final deployment, preparing Android APK/AAB builds and publishing workflows.

Game Developer

COMPLETED • 6 MONTHS

Motion Maze • Remote Studio

- Contributed as core game developer creating gameplay mechanics, UI layouts, and programming logic for mobile titles.
- Conducted rigorous code debugging, performance improvements, and game asset integration across team milestones.

The Forgotten Train – VR Escape Experience

META QUEST VR

Game Designer • Unity Developer • 3D Environment Artist

An atmospheric, story-driven VR escape room experience developed for Meta Quest where players solve intricate environmental puzzles inside an ominous, dynamically moving locomotive.

- ▶ Designed multi-stage puzzle mechanics, door locks, hidden clues, and narrative trigger sequences.
- ▶ Implemented direct VR hand-presence, physics grabbing, socket snapping, and item inspection via Unity XR Interaction Toolkit.
- ▶ Modeled, textured, and lit atmospheric 3D train carriage environments, modular props, and visual effects in Blender & Unity.
- ▶ Optimized geometry, draw calls, and lighting baked shaders to ensure silky-smooth 72 FPS standalone VR performance.

8+ Published Mobile Game Titles

Google Play Store Releases

Commercially shipped mobile games with full gameplay loops, UI menus, audio, monetization, and store deployment:

 Selah: Bible Charades Jewel Crush Quest 2468 Block Puzzle Mr Greedy Snake Escape
